

The Company

Knowledge about your business processes, technical facts, your customers and your competition as well as compliance has become a strategic factor for your enterprise

Knowledge, often only stored in documents on file shares or even in your employees' minds needs to be systematically collected, organized and secured. Knowledge is based on information, on relations between information and on rating of information. Today often the knowledge of an enterprise is so comprehensive that only state of the art IT systems can manage and handle it.

Our mission is to make the knowledge in your enterprise visible and secure as well.

Our main skills are

- Document, content and knowledge management
- Online services
- Virtualization and storage solutions and
- Communication und network security.

Our employees are IT professionals with Master's certificate and a several years experience in the IT business. The same graduations are also valid for our partners.

To transfer and to document the knowledge is one of our strength. Therefore we additionally offer services for technical documentation and translation.

Content management means to structure and classify content and to specifically organize and publish it as well as to customize the layout regarding to the company's corporate identity.

Complex issues always need to be trained. We support your employees by offering specific multimedia trainings.

As a service oriented IT company Web4you NetworX is working with a lean organization and a network of competent partners to offer high quality of work and best services to our customers.

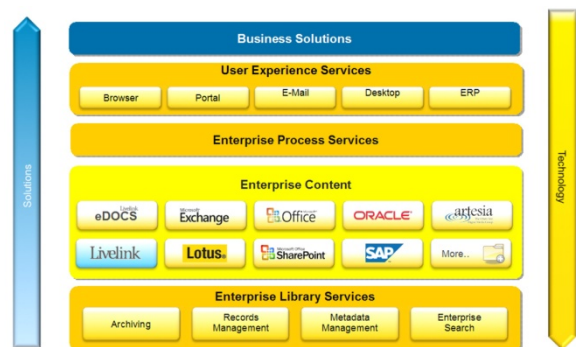

Our Service Offerings

OPEN TEXT

The Content Experts™

Enterprise Content Management with OpenText Livelink / ECM Suite

Livelink ECM enables worldwide operating groups and enterprises with distributed branches to implement a centralized knowledge management, to support collaboration in distributed projects and to manage business processes as well.

As a long-standing OpenText partner we support our customers in implementing, customizing and running Livelink ECM.

Collaboration and Document Management with MS Office SharePoint Server

Collaboration, document management and workflows are well supported by SharePoint due to its seamless integration in Microsoft Office. We support our customers in implementing, customizing and running SharePoint.

Microsoft® Online Services

Online Services – Cloud Computing

Microsoft is offering its Windows Azure based Online Services to small and mid-sized companies as a cost-efficient Software-as-a-Service solution. Customers can use via Internet Exchange Online, SharePoint Online, Office Communications Online, LiveMeeting und Dynamics CRM Online, either bundles or as single services.

This enables customers to widely turn down their own IT equipment. Just some PCs or Laptops, a network switch and a broadband internet access is necessary to run their business.

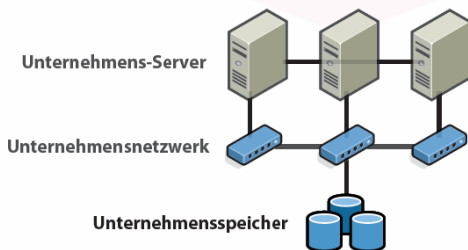

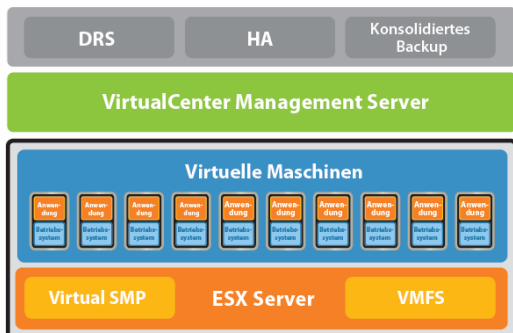

As a Microsoft Online Services partner we support you in planning and implementing your Online Services solution.

Virtualization with VMware VI

Today server and desktop virtualization is the suitable » Green IT« approach to dramatically decrease energy costs and to improve availability and security of IT systems. As a VIP Professional partner of VMware we support you in implementation of virtualization solutions..

VMware Infrastructure
