**Royal Dutch Shell plc, Cyberjaya, Den Haag, Bangalore, London, Houston (2008)**

Upgrade Project, to migrate worldwide all Shell Livelink instances to the current Livelink version. There are currently about 60,000 Livelink users at Shell, working with more than 40 Livelink instances. This upgrade project has been very ambitious, due many 3<sup>rd</sup> party and customized modules. Furthermore storage of several TB of data and a hugh number of active users had to be considered. All upgrades had to be done with minimal influence on the running production systems to minimize the down time for users. Duration: 10 month
